Professional Summary

Process-driven Web Developer based in San Diego, currently pursuing a B.S. in Computer Science from the University of London. Translates years of operational leadership into digital engineering to architect scalable, highly efficient software systems.

Professional Experience

Full-Time Education & Technical Portfolio Development
Independent | Nov 2024 – Present

- Transitioned from full-time field operations to engineer full-stack data solutions, dedicating 60+ hours weekly to a BS in Computer Science while building and deploying a comprehensive portfolio of production-ready web applications.
- Fast-tracked university degree requirements by completing the IBM Data Science and the Google IT credential for Recognition of Prior Learning (RPL).
- Architected and deployed complex web applications and data pipelines, bridging traditional project management with modern software engineering practices.
- Earned the Meta Full-Stack Developer specialization to deepen practical expertise in the complete software development lifecycle (SDLC), secure backend integration, and modern web architecture.

Mobileweld | Operations Project Lead (QC)
Nov 2018 – Nov 2024

- **Project Management:** Created and maintained documentation for 3+ concurrent projects, simplifying cross-team communication and reducing fabrication errors.
- **Data Optimization:** Developed custom cost-analysis and tracking tools utilizing Google Sheets, resulting in a 20% improvement in budget efficiency.
- **Mathematically Driven Workflow:** Reduced fabrication times by 40% by applying mathematical modeling to optimize production workflows.
- **Leadership:** Directed cross-functional teams through full project lifecycles, consistently delivering high-quality products on budget and ahead of schedule.
- **Quality Systems Engineering:** Implemented safety and Quality Control protocols, achieving a zero-incident record over 12 months.

Featured Projects

Thrust Insights | SpaceX Data Science & Interactive Dashboard

- **Description:** Quantified aerospace reusability metrics by engineering a custom data pipeline to aggregate 15+ years of fragmented telemetry.
- **Data Pipeline**: Raw launch telemetry → Python analysis → JSON export → React Dashboard.
- **Technologies:** Python (Pandas, Scikit-learn, Matplotlib), React, TypeScript, Tailwind CSS, Netlify.

Freelance Web Agency Portal | Front-End API & Serverless Integration

- **Problem Solved:** Engineered a scalable lead-generation platform for a web design business, automating client communication and inquiry tracking without relying on heavy backend infrastructure.
- **Technical Scope:** Developed a responsive front-end integrated with the Mailgun API for automated email routing. Engineered a serverless backend workflow utilizing Google Apps Script to securely capture, validate, and synchronize custom form data.

The Roasting Room | Full-Stack E-commerce & Automated Order System

- **Description:** Engineered a secure, full-cycle e-commerce platform that synchronizes retail transactions with a custom inventory management backend.
- **Data Pipeline:** React (Context API) → Django REST Framework → Stripe API/Webhooks → Supabase (PostgreSQL).
- **Technologies: Django**, **React (Vite)**, PostgreSQL, Stripe API, JWT Authentication, Supabase, REST.

Technical Skills

- **Languages: JavaScript**, HTML, CSS, **Python**, SQL.
- **Frameworks & Libraries:** React, **Django REST Framework**, Node.js.
- **Tools & Infrastructure:** Git/GitHub, **Vite, Stripe API (Webhooks)**, **PostgreSQL (Supabase)**, REST APIs, Netlify, Cloudflare, Figma.

Education

BSc in Computer Science | University of London | (Expected 2028)

Certifications

- **Google Project Management Specialization** – Coursera (Mar 2024)
- **IBM Data Science Professional Certificate** (RPL**)** – Coursera (Dec 2024)
- **Google IT Support Professional Certificate** (RPL**)** – Coursera (Feb 2025)
- **Meta Full-stack Developer Specialization** – Coursera Jan 2026
- **IBM AI Engineering – Coursera Jun 2026** (RPL**)** – Coursera (Jul 2026)
- **IBM Data Analyst – Coursera Jun 2026** (RPL**)** – Coursera (Oct 2026)
